

 <p>GIG CYMRU NHS WALES Iechyd Cyhoeddus Cymru Public Health Wales</p>	<p>Name of Meeting Quality, Safety and Improvement Committee</p> <p>Date of Meeting 13 December 2023</p> <p>Agenda item: 5.2</p>
---	---

Policy / Procedure Review and Approval Report

Section 1 - Policy / Procedure Information

Policy / Procedure Title	SHARPS & EXPOSURE INJURY & SAFE MANAGEMENT OF SHARPS POLICY & PROCEDURES
Policy Owner	Jennie Leleux, Lead Nurse for Infection Prevention & Control (Corporate)
Lead Executive	Executive Director of Quality, Nursing and Allied Health Professionals
PHW / All Wales?	PHW
Date of last Review	April 2021
Is the current policy / procedure within date?	No – procedures have now changed.
Approving Body /Group	Leadership Team and the Quality, Safety and Improvement Committee.
Version Number	2

Section 2 – Recommendation

That the Quality, Safety and Improvement Committee:

- **Considers** the information within the Sharps and Exposure Injury and Safe Management of Sharps Policy and EHIA
- **Notes** that the Leadership Team have approved the Sharps and Exposure Injury and Safe Management of Sharps Procedures

- Note that the Leadership Team have **endorsed** the Sharps Policy for approval at the Quality, Safety and Improvement Committee
- **Approves** the Sharps and Exposure Injury and Safe Management of Sharps Policy

Background:

Reason for review	The procedure for managing sharps injuries had changed and required review. The Sharps Policy was therefore updated to ensure consistency. References were updated in the policy and procedures.
--------------------------	---

3 – Details of the Review:

Consultation:

Has this Policy / Procedure been through the appropriate consultation process?	Yes.
Date range of consultation:	The formal consultation period ran from 11.10.23 to 08.11.23. The Policy and procedure were submitted to the Leadership Team for review/ comment and endorsement on 15/11/2023 following the completion of the consultation period and final review and sign off by the Deputy Director of Quality, Nursing and Allied Health Professionals.
Please provide details of any feedback received and outline what changes if any were made to the document as a result:	
No further comments were received during this time.	

<p>Had this policy / procedure been considered by any other groups?</p>	<p>Prior to the formal consultation period:</p> <p>A small working group was formed to ensure the sharps injury policy /procedure was accurate and workable. This was made up of the Lead Nurse for Infection Prevention & Control, a Welsh Ambulance Trust Occupational Health Nurse and the Advanced Nurse Practitioner, Wales Specialist Virology Centre (previous author of the suite of documents).</p> <p>The IPC Group was given opportunity to comment on the documents prior to the formal consultation period. A representative from the Radiographer Managers in Breast Test Wales was also included in this. HARP infection prevention nurses were also given access to the documents at this point.</p> <p>The acting Director of Quality, Nursing and Allied Health Professionals approved the documents prior to being placed on the consultation database.</p> <p>The WAST policy/procedure and Cardiff and Vale UHB's policy were used to inform background information. However, PHW is unique in its set up and access to clinical services so a tailored approach was required.</p>
<p>If so, please provide detail of any comments / feedback or amendments made to the documents as a result of this</p>	
<p>Main changes are that we removed the requirement for the source service user to have blood taken. There is no opportunity to take blood while the service user is still in the screening service and we didn't have an easy way of feeding back any results if they did go to their GP due to governance issues. The blood would be taken after all interventions would have started and would not influence decisions made.</p>	

4 – Impact Assessments

Equality and Health Impact Assessment	Has been completed
Risk and Assurance	Relates to Strategic Risk ?
Health and Care Standards	<p>This Policy / Procedure supports and/or takes into account the Health and Care Standards for NHS Wales Quality Themes</p> <p>Theme 1 - Staying Healthy Theme 5 - Timely Care Theme 2 - Safe Care</p>
Financial implications	There are no financial implications in implementing these policies and procedures.
People implications	Staff should feel more confident about managing sharps and what to do if a sharps or exposure injury occurs. Quick action following an injury enables treatment to commence where necessary and emotional support to be offered, lowering the risk of ongoing health effects.

5 - Implementation

Implementation plan (with timescales)		
Next steps	Timescale	Responsible officer(s)
Approval to be sought by the Leadership Team and Quality, Safety and Improvement Committee	November / December 2023	Jennie Leleux
Translation into Welsh	2 weeks after approval	Jennie Leleux
Disseminate across the Organisation		Jennie Leleux

SHARPS & EXPOSURE INJURY & SAFE MANAGEMENT OF SHARPS POLICY

Policy Statement

This policy outlines the commitment of Public Health Wales to adhere to current guidance advising on the management of occupational exposure to blood and high-risk body fluids and the prevention of exposure injury through recommended sharp safety practice. This policy is required as Public Health Wales staff may undertake clinical procedures and require current evidence-based guidance to advise how best to avoid injury and the appropriate action to take should injury occur. This policy and associated procedure document should be adopted, for infection prevention and control practices and procedures.

The information in the supporting procedure documents provide:

- A clear, evidence-based framework to ensure safe practice in the use of clinical sharps devices.
- A clear procedure for the management of inoculation or exposure injury where blood to blood contact may have occurred.

Policy Commitment

This policy affirms the commitment of Public Health Wales to ensuring the safety of staff within the workplace by providing current guidance on the management of occupational exposure to blood and high-risk body fluids and the prevention of exposure injury through sharp safety. This policy is relevant for all staff involved in clinical practice within the organisation to ensure PHW is compliant with Health & Safety legislation.

The associated Procedure document aims to provide best practice guidance on the management of occupational exposure to blood and high-risk body fluids and the prevention of exposure injury through the sharp safety to staff.

Supporting Procedures and Written Control Documents

This Policy will be supported by the following Public Health Wales's Policies and Procedures:

5.	<p>Who will be affected by the strategy/ policy/ plan/ procedure/ service</p> <p>Consider staff as well as the population that the project/change may affect to different degrees.</p>	<p>Those affected by this review will be Public Health Wales staff and potentially, service users (in the instance of an sharps/exposure injury).</p>

Part 2- Equality and Welsh language

6. EQIA / How will the strategy, policy, plan, procedure and/or service impact on people?

Questions in this section relate to the impact on people on the basis of their 'protected characteristics'.

How will the strategy, policy, plan, procedure and/or service impact on:-	Potential positive and/or negative impacts (unintended consequences) Opportunities or gaps	Action taken by Directorate. Make reference to where the mitigation is included in the document, as appropriate This column is to be updated in future reviews	Recommendations for improvement/ mitigation/ identified gaps or opportunities
6.1 Age For most purposes, the main categories are: <ul style="list-style-type: none"> • under 18; • between 18 and 65; and • over 65 	This Policy & Procedures does not impact on this group. The two Screening Services that have contact with sharps are Breast Test Wales Biopsy services and Diabetic Eye Screening Wales (through service user equipment) and these see a wide age range of service users. These policy/procedure documents should help staff feel confident about	N/A	N/A

How will the strategy, policy, plan, procedure and/or service impact on:-	Potential positive and/or negative impacts (unintended consequences) Opportunities or gaps	Action taken by Directorate. Make reference to where the mitigation is included in the document, as appropriate This column is to be updated in future reviews	Recommendations for improvement/ mitigation/ identified gaps or opportunities
	managing sharps and any exposure injuries.		
6.2 Persons with a disability as defined in the Equality Act 2010 Those with physical impairments, learning disability, sensory loss or impairment, mental health conditions, long-term medical conditions such as diabetes	There is a need to meet communication needs and support informed consent to take a blood sample, for example with people with a learning disability.	An advocacy service and availability of easy read materials would aid communication and support informed consent.	N/A
6.3 People of different genders: Consider men, women, people undergoing gender reassignment NB Gender-reassignment is anyone who proposes to, starts, is going through	This Policy & Procedures does not impact on this group.	N/A	N/A

How will the strategy, policy, plan, procedure and/or service impact on:-	Potential positive and/or negative impacts (unintended consequences) Opportunities or gaps	Action taken by Directorate. Make reference to where the mitigation is included in the document, as appropriate This column is to be updated in future reviews	Recommendations for improvement/ mitigation/ identified gaps or opportunities
or who has completed a process to change his or her gender with or without going through any medical procedures. Sometimes referred to as Trans or Transgender			
6.4 People who are married or who have a civil partner.	This Policy & Procedures does not impact on this group.	N/A	N/A
6.5 Women who are expecting a baby, who are on a break from work after having a baby, or who are breastfeeding.	This Policy & Procedures does not impact on this group.	N/A	N/A
6.6 People of a different race, nationality, colour, culture or ethnic origin including non-English speakers,	The procedure for follow up of a sharps/exposure injury requires the risk assessment and taking of a blood sample from the Source person, with	The need for translation services has been stated in section 4.1.1 of the Sharps and Exposure Injury Procedure.	N/A

How will the strategy, policy, plan, procedure and/or service impact on:-	Potential positive and/or negative impacts (unintended consequences) Opportunities or gaps	Action taken by Directorate. Make reference to where the mitigation is included in the document, as appropriate This column is to be updated in future reviews	Recommendations for improvement/ mitigation/ identified gaps or opportunities
gypsies/travellers, migrant workers	consent. If the service user does not speak or understand English sufficiently to make an informed decision, translation/interpretation services must be made available.		
6.7 People with a religion or belief or with no religion or belief. The term 'religion' includes a religious or philosophical belief	This Policy/Procedure may impact on people with religious beliefs that include not consenting to the use of blood or blood transfusions for medical procedures.	If consent to take blood is not given, the process for 'unknown source' should be followed. The service user should not be put under any pressure to participate.	N/A
6.8 People who are attracted to other people of: <ul style="list-style-type: none"> • the opposite sex (heterosexual); • the same sex (lesbian or gay); • both sexes (bisexual) 	This Policy & Procedures does not impact on this group.	N/A	N/A

How will the strategy, policy, plan, procedure and/or service impact on:-	Potential positive and/or negative impacts (unintended consequences) Opportunities or gaps	Action taken by Directorate. Make reference to where the mitigation is included in the document, as appropriate This column is to be updated in future reviews	Recommendations for improvement/ mitigation/ identified gaps or opportunities
6.9 People according to their income related group: Consider people on low income, economically inactive, unemployed/workless, people who are unable to work due to ill-health	This Policy & Procedures does not impact on this group.	N/A	N/A
6.10 People according to where they live: Consider people living in areas known to exhibit poor economic and/or health indicators, people unable to access services and facilities	This Policy & Procedures does not impact on this group.	N/A	N/A
6.11 Consider any other groups and risk factors relevant to this strategy, policy, plan, procedure and/or service	This Policy & Procedures does not impact on other groups.	N/A	N/A

How will the strategy, policy, plan, procedure and/or service impact on:-	Potential positive and/or negative impacts (unintended consequences) Opportunities or gaps	Action taken by Directorate. Make reference to where the mitigation is included in the document, as appropriate This column is to be updated in future reviews	Recommendations for improvement/ mitigation/ identified gaps or opportunities
6.12 Welsh Language			
There are 2 key considerations to be made during the development of a policy, project, programme, service to ensure there are no adverse effects and/or a positive or increased positive effect on: (please note these will continue to be reviewed to ensure Public Health Wales fulfils their duties to comply with one or more standards outlined within the Welsh Language Standards (No 7) Regulations 2018)			
Opportunities for persons to use the Welsh language	The Sharps and Exposure Injury and Safe Management of Sharps Policy and Procedure documents will be produced in both English and Welsh and therefore will not discriminate against any person who wishes to communicate in Welsh. However, there may be a delay in the availability of copies in both languages due to translation service timescales.	Require Translation services to convert the document into Welsh for publication. If communication is required in Welsh then access to translation services will be required.	To translate document as per PHW policy.

How will the strategy, policy, plan, procedure and/or service impact on:-	Potential positive and/or negative impacts (unintended consequences) Opportunities or gaps	Action taken by Directorate. Make reference to where the mitigation is included in the document, as appropriate This column is to be updated in future reviews	Recommendations for improvement/ mitigation/ identified gaps or opportunities
	Infection Prevention & Control contains specialised language. If verbal communication is required in Welsh, a specialised translation service may be required.		
Treating the Welsh language no less favourably than the English language	The Sharps and Exposure Injury and Safe Management of Sharps Policy and Procedure documents will be produced in both English and Welsh.	Require Translation services to convert the document into Welsh for publication.	To translate document as per PHW policy.

Part 3 – Health

Questions in this section relate to the impact on the health and wellbeing outcomes of the population **and** specific population groups who could be more impacted than others by a policy/project/proposal.

The part of the assessment identifies;

- which specific groups in the population could be impacted more (inequalities)
- what those potential impacts could be across the wider determinants of health framework?
- Potential gaps, opportunities to maximise positive H&WB outcomes
- Recommendations/mitigation to be considered by the decision makers

7. Identification of specific population groups

Use the WHIASU Population Groups checklist as a reference to identify the population groups who could be more impacted than others by a policy/project/proposal. The check list can be found on the PHW Integrated EqHIA guidance pages (requires link to PHW Intranet pages for additional information and resources)

The groups listed have been identified as more susceptible to poorer health and wellbeing outcomes (health inequalities) and therefore it is important to consider them in a HIA assessment. In a HIA, the groups identified, as more sensitive to potential impacts will depend on the characteristics of the local population, the context, and the nature of the proposal itself.

7.1 Groups identified	Rational/explanation
<p>6.6 Non-English speakers</p>	<p>The procedure for follow up of a sharps/exposure injury requires the risk assessment and taking of a blood sample from the Source person, with consent. If the service user does not speak or understand English sufficiently to make an informed decision, translation services must be made available.</p>
<p>6.7 People with a religion or belief or with no religion or belief. The term 'religion' includes a religious or philosophical belief</p>	<p>This Policy/Procedure may impact on people with religious beliefs that include not consenting to the use of blood or blood transfusions for medical procedures. If consent to take blood is not given, the process for 'unknown source' should be followed. The service user should not be put under any pressure to participate.</p>

<p>6.2 Persons with a disability as defined in the Equality Act 2010 Those with physical impairments, learning disability, sensory loss or impairment, mental health conditions, long-term medical conditions such as diabetes</p>	<p>There is a need to meet communication needs and support informed consent to take a blood sample, for example with people with a learning disability. An advocacy service and availability of easy read materials would aid communication and support informed consent</p>
--	--

Assessment

Complete the wider determinants framework table below providing rational/evidence where appropriate:

1. Consider how the proposal could impact on the population and specific population groups identified above (positive/negative) for each of the wider determinants (the bullets under each determinant are there as a guide)
2. Record any unintended consequences (negative impacts) and/or gaps identified
3. Record any positive impacts or missed opportunities to maximise positive health and wellbeing outcomes
4. identify and record mitigation/recommendations where appropriate

Please note you may find that not all determinants are relevant to the project/plan however recording N/A is not acceptable a rational or evidence should be explained/referenced

Wider determinant for consideration	Positive impacts or additional opportunities	Unintended consequences or gaps	Population groups affected	Mitigation/recommendations
<p>7.2 Lifestyles</p> <ul style="list-style-type: none"> • Diet/nutrition/breastfeeding • Physical activity • Use of alcohol, cigarettes, e-cigarettes • Use of substances, non-prescribed drugs, abuse of prescription medication • Social media use • Sexual activity • Risk-taking activity i.e. gambling, addictive behaviour 	<p>Adherence to this policy by staff members will lower the risk of sharps/exposure injuries as far as is reasonably possible and ensure care following an injury is prompt and holistic,</p>	<p>No unintended consequences identified.</p>		

	<p>for both the injured party and the Source, thereby protecting the health and wellbeing of both staff and service users.</p>			
<p>7.3 Social and community influences on health</p> <ul style="list-style-type: none"> • Adverse childhood experiences • Citizen power and influence • Community cohesion, identity, local pride • Community resilience • Domestic violence • Family relationships • Language, cultural and spirituality • Neighbourliness • Social exclusion i.e. homelessness • Parenting and infant attachment • Peer pressure • Racism • Sense of belonging • Social isolation/loneliness • Social capital/support/networks • Third sector & volunteering 	<p>Adherence to this policy by staff members will lower the risk of sharps/exposure injuries as far as is reasonably possible and ensure care following an injury is prompt and holistic, for both the injured party and the Source, thereby protecting the health and wellbeing of both staff and service users.</p>	<p>No unintended consequences identified.</p>		
<p>7.4 Mental Wellbeing</p> <ul style="list-style-type: none"> • Does this proposal support sense of control? • Does it enable participation in community and economic life? • Does it impact on emotional wellbeing and resilience? 	<p>Experiencing a sharps/exposure injury produces anxiety. This set of documents is intended to limit the negative effects of sharps/exposure injuries through</p>	<p>No unintended consequences identified.</p>		

	<p>lowering the risk of them occurring, and providing clear guidance for prompt assessment and treatment, plus psychology support in the event of an injury. It also gives clear guidance on how to support the Source through the process of consenting to blood tests.</p>			
<p>7.5 Living/ environmental conditions affecting health</p> <ul style="list-style-type: none"> • Air quality • Attractiveness/access/availability/quality of area, green and blue space, natural space. • Health & safety, community, individual, public/private space • Housing, quality/tenure/indoor environment • Light/noise/odours, pollution • Quality & safety of play areas (formal/informal) • Road safety • Urban/rural built & natural environment • Waste and recycling • Water quality 	<p>Adherence to this policy by staff members will lower the risk of sharps/exposure injuries as far as is reasonably possible and ensure care following an injury is prompt and holistic, for both the injured party and the Source, thereby protecting the health and wellbeing of both staff and service users.</p>	<p>No unintended consequences identified.</p>		

<p>7.6 Economic conditions affecting health</p> <ul style="list-style-type: none"> • Unemployment • Income, poverty (incl. food and fuel) • Economic inactivity • Personal and household debt • Type of employment i.e. permanent/temp, full/part time • Workplace conditions i.e. environment culture, H&S 	<p>Adherence to this policy by staff members will lower the risk of sharps/exposure injuries as far as is reasonably possible and ensure care following an injury is prompt and holistic, for both the injured party and the Source, thereby protecting the health and wellbeing of both staff and service users.</p>	<p>No unintended consequences identified.</p>		
<p>7.7 Access and quality of services</p> <ul style="list-style-type: none"> • Careers advice • Education and training • Information technology, internet access, digital services • Leisure services • Medical and health services • Other caring services i.e. social care; Third Sector, youth services, child care • Public amenities i.e. village halls, libraries, community hub • Shops and commercial services • Transport including parking, public transport, active travel 	<p>Adherence to this policy by staff members will lower the risk of sharps/exposure injuries as far as is reasonably possible and ensure care following an injury is prompt and holistic, for both the injured party and the Source, thereby protecting the health and wellbeing of both</p>	<p>No unintended consequences identified.</p>		

	staff and service users.			
7.8 Macro-economic, environmental and sustainability factors <ul style="list-style-type: none"> • Biodiversity • Climate change/carbon reduction/flooding/heatwave • Cost of living i.e. food, rent, transport and house prices • Economic development including trade • Government policies i.e. Sustainable Development principle (integration; collaboration; involvement; long term thinking; and prevention) • Gross Domestic Product • Regeneration 	Adherence to this policy by staff members will lower the risk of sharps/exposure injuries as far as is reasonably possible and ensure care following an injury is prompt and holistic, for both the injured party and the Source, thereby protecting the health and wellbeing of both staff and service users.	No unintended consequences identified.		

Stage 3

Summary of key findings and actions Please answer question 8.1 following the completion of the EHIA and complete the action plan

Key findings: Impacts/gaps/opportunities	Actions (what is needed and who needs to do) to address the identified mitigation and recommendations	Lead		
Experiencing a sharps/exposure injury produces anxiety. This set of documents is intended to limit the negative effects of sharps/exposure injuries through	Information contained in this suite of policy & procedure documents will be cascaded to staff. Datix incidents will be monitored for trends and learning points to identify any further training/input required.	Jennie Leleux, Lead Nurse for Infection		

<p>lowering the risk of them occurring, and providing clear guidance for prompt assessment and treatment, plus psychology support in the event of an injury. It also gives clear guidance on how to support the Source through the process of consenting to blood tests.</p>		Prevention & Control.
