*diagnoses made in clinics in Carmarthenshire or Pembrokeshire were not included in these analyses. i) HIV rates were based on the number of individuals receiving HIV-related care, as reported in SOPHID by PHE, October 2016. ii) Diagnoses of STIs were reported from SHCs across Wales via SWS. iii) These data have not been imputed and may be partially representative of completeness of reporting. In addition, only individuals for whom a residence LA was provided were included. iv) The following KC60/SHHAPT codes were used: gonorrhoea (B, B1, B2), chlamydia (C4, C4A, C4C), first episode of genital herpes (C10A), first episode of genital warts (C11A) and STI tests (S1, S2, T1, T2, T3, T4). v) Gender- and LA-specific rates were calculated using mid-year estimates provided by StatsWales

*diagnoses made in clinics in Carmarthenshire or Pembrokeshire were not included in these analyses. i) HIV rates were based on the number of individuals receiving HIV-related care, as reported in SOPHID by PHE, October 2016. ii) Diagnoses of STIs were reported from SHCs across Wales via SWS. iii) These data have not been imputed and may be partially representative of completeness of reporting. In addition, only individuals for whom a residence LA was provided were included. iv) The following KC60/SHHAPT codes were used: gonorrhoea (B, B1, B2), chlamydia (C4, C4A, C4C), first episode of genital herpes (C10A), first episode of genital warts (C11A) and STI tests (S1, S2, T1, T2, T3, T4). v) Gender- and LA-specific rates were calculated using mid-year estimates provided by StatsWales

i) Diagnoses of STIs were reported from SHCs across Wales via SWS

ii) New HIV diagnoses from all settings, not limited to SHCs, as reported by PHE (October 2016)

iii) Incidences were calculated per 100,000 gender-specific populations, using mid-year estimates provided by StatsWales

iv) Diagnoses made in clinics in Carmarthenshire and Pembrokeshire, reported on paper SHHAPT forms, have also been included. However, this was not possible for latent syphilis (A3) as this is not available by age from these clinics.

v) The following KC60/SHHAPT codes were used: primary, secondary and early latent syphilis (A1, A2, A3), gonorrhoea (B, B1, B2), chlamydia (C4, C4A, C4C), first episode of genital herpes (C10A) and first episode of genital warts (C11A)
