01/09/2021 - Designed to Smile - let's get smiling again!

The Welsh Government funded programme for oral health improvement is restarting in primary schools and nurseries. Designed to Smile celebrated 10 years of improving children's health before the pandemic. Returning from essential NHS Covid-19 roles, our staff will be contacting settings to train teaching staff, gain parental consent and provide equipment to re-start the Daily Toothbrushing Scheme. The Fluoride Varnish programme will also recommence. Processes have been reviewed by Public Health Wales.

Please wait for contact from your local Designed to Smile team before beginning your programme. Designed to Smile news item in Dysg [newsletter](#)
