

Tooth Types

Humans have four types of teeth:

Incisors, Canines, Premolars, and Molars.

Upper Teeth

Lower Teeth

Each tooth type has a special use when we bite and chew food.

Incisors

have a sharp biting surface and are used for cutting food into small chewable pieces.

Canines

have a sharp, pointed biting surface to grip and tear food.

Premolars

have a flat biting surface used to tear and crush food.

Molars

are the largest teeth. They have a large flat biting surface to chew, crush and grind food.
