Ward-level teenage conceptions in 2011-13 in Powys Teaching HB

Author: Mari Jones, Rhys Powell

Date: March 2016

Version: 1

Publication / Distribution: Internal

Purpose and Summary of Document:

This document shows information on teenage conceptions amongst females aged under 16 and 18 for the years 2011-13. It also contains ward level (also known as electoral divisions) conception rates grouped into ranges from highest to lowest shown on a map, and a table showing statistical significance compared to Wales. In addition, teenage abortions amongst female aged under 18 for the years 2012-14 are presented at local authority level. These three pieces of information should be combined to interpret the data and potentially identify areas of particular concern.

Notes:

These data need to be interpreted with extreme caution due to small numbers and population sizes, and variation in population between wards (electoral divisions). The ONS have suppressed data where counts were fewer than five in the three-year period available.

Ward rates and numbers of conceptions are subject to strict conditions of supply by ONS and cannot be shared outside of Public Health Wales or reproduced in documents/via the internet. The information in this document has specifically been prepared in a format that can be shared with external partners.

Conceptions in females aged under 18*, wards in Powys Teaching Health Board, 2011-13
