

Health of Children and Young People Denbighshire

In 2011, there were approximately 27,100 children and young people aged 0 to 24 years resident in Denbighshire. This accounts for 28.9% of the area's population, which is below the all-Wales average of 30.3%.

Every child and young person has the right to be happy, healthy and safe. Any consideration of the child must also take account of the family, whose role is paramount.

In Wales:

- the majority of children and young people in Wales are healthy and satisfied with their lives
- one in five of those aged 0-19 years live in poverty
- only around half of newborn babies are breastfed
- many older children still remain susceptible to vaccine preventable diseases such as measles
- more than a quarter of 16-24 year olds smoke

Coordinated interagency action at national and local level is required to improve the health of children and young people and its determinants. Working with children and families is essential to build on assets and address needs.

This local authority profile should be read in conjunction with the report entitled *Health of children and young people in Wales* and its supporting technical guide which can both be accessed via the Observatory's website at:

Key data from the 2011 Census

	LA count (n)	LA %	Wales %
Population aged 0-24 ^{1, a}	27,100	28.9	30.3
Lone parent households ^{2, b}	2,820	7.0	7.5
Overcrowded households with dependent children ^{3, b}	550	31.2	26.3
16-24 year olds unemployed ^{4, b}	960	16.6	15.7
0-24 year olds providing unpaid care ^{5, b}	900	3.4	3.2

Child deprivation^{6, c}

Lower super output areas, equal count, national fifths of deprivation

Indicator (all use 2011 data): **1.** % of total population; **2.** % of households that consist of lone parents with dependent children (0-15 years or 16-18 years and in full time education); **3.** % of households with dependent children (0-15 years or 16-18 years and in full time education) that have more than 1.5 persons per bedroom; **4.** Excludes students; **5.** % that look after or give help or support to family members, friends, neighbours or others because of long-term physical or mental ill-health or disability, or problems related to old age; **6.** Welsh Index of Multiple Deprivation (WIMD) 2011 Child Index which is constructed from indicators relating to income, health, education, geographical access to services, housing, physical environment and community safety.

Data source: **a.** Mid-year population estimates (ONS); **b.** 2011 Census (ONS); **c.** 2011 Welsh Index of Multiple Deprivation Child Index (WG).

Summary of health and well-being

How does this Local Authority (LA) area compare to Wales as a whole?

Lower Comparable Higher Could not be calculated

	LA count (no. of events)	LA rate	Wales			Trend LA Wales	
			Lowest LA rate	Average rate	Highest LA rate
