

All Wales Diabetes Prevention Programme (AWDPP): One Year On

Activity Report for June 2022 – May 2023

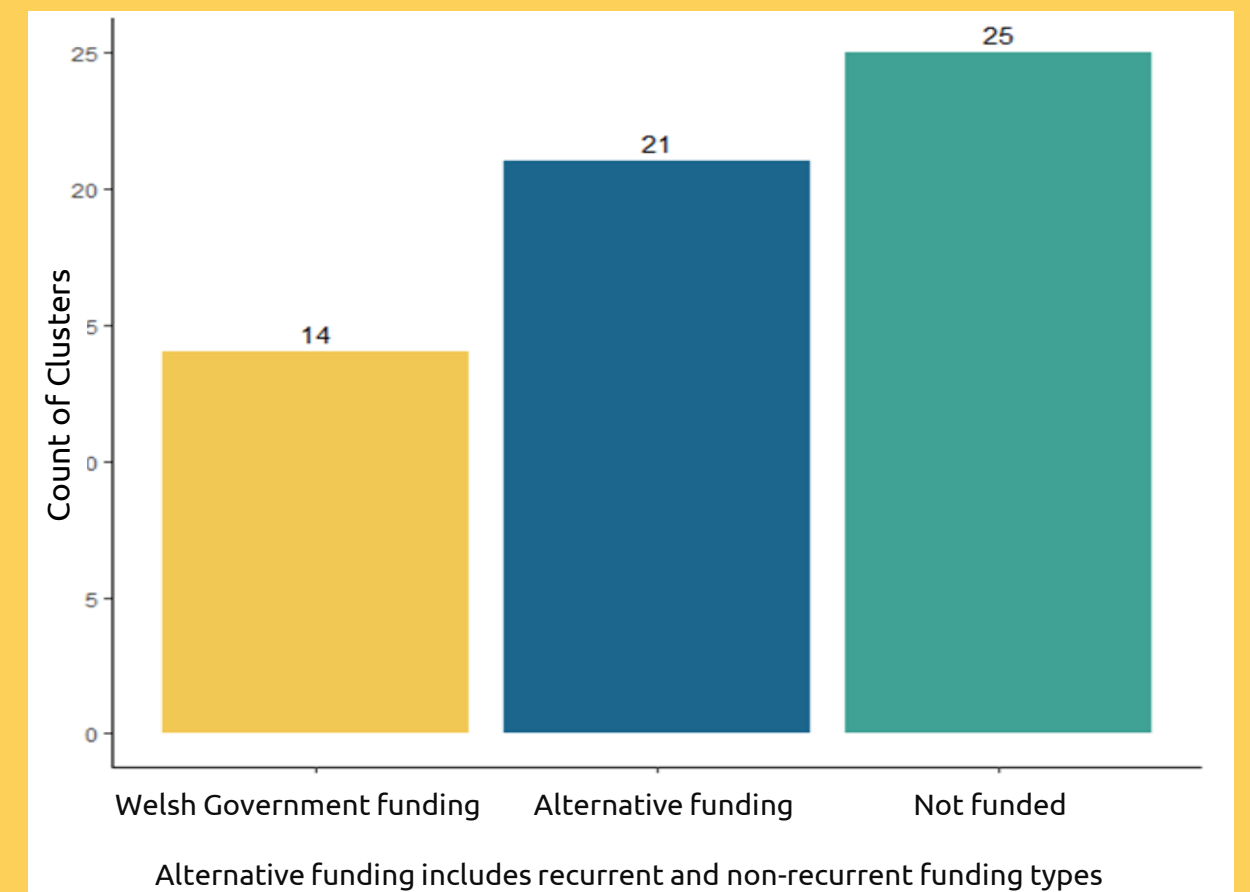

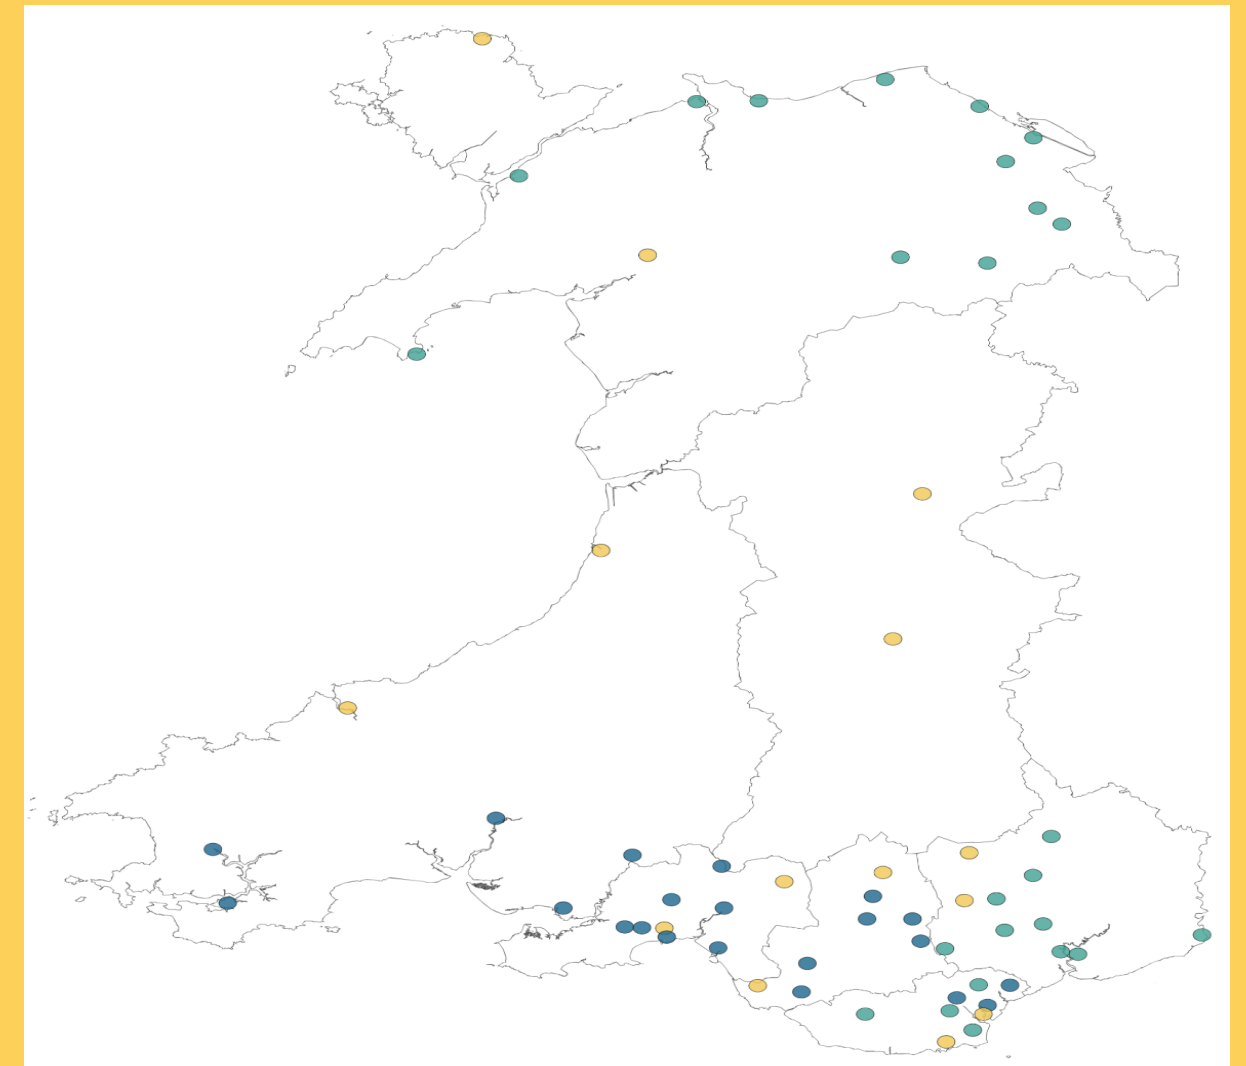

Nick Gregory, James Bailey, Harvey Carman,
Charlotte Grey, Catherine Washbrook
and Amrita Jesurasa

Public Health Wales

AWDPP OVERVIEW

- In March 2021, Welsh Government announced funding of £1 million per annum up to March 2024, to commence the rollout, with embedded evaluation, of a national type 2 diabetes prevention programme, led by Public Health Wales
- In the first phase, this funding supported delivery of the All Wales Diabetes Prevention Programme (AWDPP) in 14 primary care clusters (two per health board; see map – yellow dots) across Wales
- In some health boards, other sources of funding are being used to extend the rollout of the AWDPP (see map - blue dots)
- This report presents 12 months of activity data for the AWDPP following its launch in Diabetes Awareness Week on 16th June 2022
- The AWDPP involves a brief intervention, delivered by trained Health Care Support Workers, supervised by local dietitians, to people identified as being at risk of developing type 2 diabetes (HbA1c 42-47 mmol/mol)

Key Statistics: June 2022– May 2023

Identification, Invitations, Bookings, Attendance and Uptake*

People identified using
