

Abdominal Aortic Aneurysm Screening - 2020/2021 Inequity Key Messages

This information will help screening and our partners work towards improving uptake and reducing inequities.

Men aged 65 were invited to take part in a one-off Abdominal Aortic Aneurysm (AAA) screening test.

Due to the pandemic, screening paused in March 2020.

Screening started to invite people again.

Fewer people were invited to take part in AAA screening.

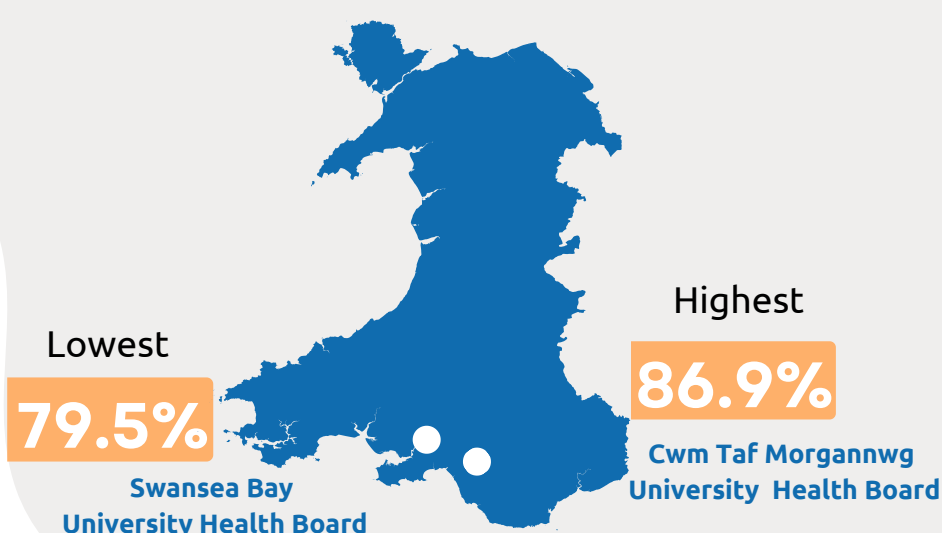

Uptake = the proportion of eligible invited participants screened within six months of invitation, making this the latest available data as of October 2021.

Screening uptake

2020/2021 84.6%

Minimum Standard 80%

Geographical variation in uptake between Health Boards

Uptake by deprivation

Most deprived

78.5%

Least deprived

87.2%
