

## Vaccination and immunisation information for preschool managers

Vaccination saves lives, helping prevent up to 5 million deaths every year. It is a key measure in keeping children healthy and giving them the best start in life.

Nurseries and preschools play a valuable role in preventing outbreaks of disease by promoting childhood vaccination.

We want to help you make sure all children and staff at your preschool have been given up-to-date information and are fully vaccinated in line with recommended routine vaccinations.
