

Swansea Bay University Public Health Team

The placement will offer the opportunity to gain an understanding of public health through a setting and topic based approach; to look at health related data or information; to observe and contribute to work in public health in practice.

Swansea Bay University Public Health Team work closely with local Health Boards, the Public Services Board (PSB) and partners to promote, protect health and prevent disease.

Tasks during the placements will be dependent on the role required by those taking up the placement.

Roles within the team consist of Consultants, Principals, Senior Practitioners, Practitioners and administrative roles.
